Five easy steps to
maintaining the health
of you and family

- Step 1.** Find a doctor who understands and listens to you - develop a good relationship with your doctor.
- Step 2.** Have annual health checks for both adults and your children - to increase the chances of prevention or early detection.
- Step 3.** Don't put off going to the doctor. Dealing with the problem early means it is more likely you will get better quickly.
- Step 4.** If you have questions, take a list to your doctor's appointment.
- Step 5.** Take this flyer to your doctor with the attached Medicare Benefit Scheme items on your right.
